Response to Amendment

1. Following the Appeal Brief Conference decision, prosecution of this application is hereby reopened.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 10-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Clark (US 5,383,112) in view of Boulton et al (US 4,985,697).

Clark discloses an inventory management which tracks the purchase orders and copies of media of video recorders wherein a video network including a video server operates several video recorders to simultaneously recording video performances or programs on a plurality of channels., portable scanners are used to associate an employee id, a media copy code, a location code and a date and time stamp together to track inventory and to provide accountabilities for the media copies (see abstract) a billing computer 26 seen in fig. 1 that can communicate with a viewer for providing electronic books for purchase and subscribers to continue to view the information downloaded as needed. Clark does not disclose tracking the purchase of an electronic book but Boulton discloses an electronic book educational publishing that can be use and tracked by the system of Clark.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to utilize the purchase tracking system as taught by Clark into the system of Boulton because it would automatically calculate need quantities of electronic books and dates at which electronic books are needed.
